Become a key player in reducing recidivism and restoring lives to full citizenship...

RP2 is a first step toward building a viable reentry program by putting on the ground trained mentors to address the needs of our communities in reducing crime and cutting the costs of corrections. This project envisions developing and implementing a state-wide mentor-training program.

A certificate program to get you ready to make a difference in broken lives!

Leaving the protection of jail or prison most often consigns the client to the poorest of neighborhoods, unstable family relationships and poor social bonds – the very ingredients that contribute to a life of crime. While case workers make every effort to build a Release Plan, even supervised adherence to that plan is problematic without a committed mentor.

Enroll today! Limited enrollment!
